Date: _____

First Picture from Space

The paragraph below tells about a special date in August history. Can you find and mark ten errors in the paragraph? Look for errors of capitalization, punctuation, spelling, and grammar.

For many years, people had to imagine what earth look like from space? In 1959, those people got there first *real* look! On August 7 that year, the U.S. satellite *Explorer VI* transmited the first picture of Earth from space. Two year later, the first human got to seen that view when Russia send a man into space. A few week after that russian space flight, Alan Shepard become the first U.S. astronaut in space.
