Blizzards

The paragraph below explains how a blizzard is different from a snowstorm. Can you find and mark ten errors in the paragraph? You might look for errors of capitalization, punctuation, spelling, or grammar.

A blizard is different from a snowstorm because blizzards have really strong wins that blow at over 35 miles per our. Blizzards don't always produce a lot of snow, but blowing snow make it very hard to see. Blizzards can last for three hour or more. Severe blizzards have three qualities: winds over 45 Miles per hour pour visibility, and tempatures that are 10 degree or below.
