

Add Up Your Total

Miss Pickle needs someone to help her. The lunchroom cash register is broken. Can you add up these totals?

Frankie Says:

Have your child use her knowledge of addition to figure out these problems: "How old will each person in the family be in 10 years? How old will each person be in 20 years? How many students would be in your class if 11 more students came in?" Continue the activity with other real-life problems that involve adding two-digit numbers without regrouping.
