Mount St. Helens

The paragraph below tells about a special date in May history. Can you find and mark ten errors in the paragraph? You might look for errors of capitalization, punctuation, spelling, or grammar.

On the morning of May 18, 1980 Mount Saint Helens erupted. Steam and ash flew 11 mile in to the air from the volcanic mountain in Washington. Struck by an earthquake that measure 5.1 on the Richter scale, part of the mountain collapsed in an avalanche. All most 230 square miles of forest were destroy ash turned day to night as it fell over the area and beyond. Scientists still watch the volcano for sings of another major eruption.
