

PUZZLING COLUMNS

The table below contains 16 squares. One shape is in each square. **Color** all the shapes in the **first row blue**. Color the shapes in the **second row red**. Color the shapes in the **third row green**. Color the shapes in the **fourth row yellow**. Then **cut** the table **into 16 squares**. On a separate sheet of paper, **rearrange** the 16 squares **to create a new pattern**. Sound easy? **Here's the trick:** No row or column can have two pieces of the same color or shape. **Are you up to the challenge?**
