## On the Trail

Math skills: addition, multiplication, division

The Math problems below will teach you more about the Iditarod. Do the math to solve the problems.

1. In the history of the Iditarod, only four mushers have won four or more races. Rick Swenson won five Iditarod races. Susan Butcher, Martin Buser, and Doug Swingley won four races each. How many Iditarods have those four mushers won in all?
2. Four of musher Jeff King's dogs had puppies. Each of them had 7 pups. If Jeff had 101 dogs before, how many dogs does he have now?
3. Martin Buser averaged 4 miles per hour during last year's race. (That included checkpoints, rests, and stops.) If he averaged 4 mph, how many hours did it take him to finish the 1,148-mile race?
4. How many days did it take him to finish?
5. If Buser started the Iditarod race on March 2, on what date did he finish it?
