

## Where in the World Is Mrs. Waffenschmidt? #3

Name: \_\_\_\_\_

Date: \_\_\_\_\_

*Read the paragraph below. In that paragraph, everybody's favorite adventurer, Mrs. Waffenschmidt, offers clues about the place she is visiting today. Use those clues to help you figure out where in the world Mrs. Waffenschmidt is. Write your answer on the line at the bottom of the page.*

**Mrs. Waffenschmidt here! Today I'm standing on the second floor of what was called the world's greatest engineering marvel when it was constructed in 1889. You can take an elevator up, but I walked up the iron stairs to the second floor. It was pretty scary to see the ground below as I climbed higher and higher. The huge wrought-iron structure was designed by Alexandre Gustave... Oops! I almost told you his last name, which would give away the answer since this tower is named for him. I thought of treating myself to lunch at the very fancy restaurant on the second floor of this structure, which is named for a science-fiction writer who called this country his home. Instead, I saved some money and settled for just getting a soda at the snack stand.**

**Can you name where I am and in which country this tower can be found? Can you name the famous writer from this country, too?**
