

Locating Reefs in Trouble

<http://www.teachercreated.com/books/2159> Click on page 92, site 1

Key Question: Where are coral reefs located, and which ones are in danger?

Directions: Use the Coral Reefs Web site to complete this activity. Check out the coral reef map and take note of how few coral reefs there are in the world. Now click on the “hot spots,” those areas where the coral reefs are in danger. As you click through the map, use this sheet to take notes on the dangers to the coral reef. When you’re through, use this information to draft a letter of concern to the people, businesses, or government of that area. Explain to them what you think should be done to protect their precious coral reefs.

Location	What’s the Danger?	Who is Responsible?

So, What Can I Do?

Key Question: What can students do to help protect the coral reefs?

Directions: Use the Web sites listed above to learn more about the coral reefs – what they are, how they “work,” what they do, how they’re in danger. After you’re done, get together with a partner and discuss an answer to this question: “What can I do to help save the coral reefs?” Brainstorm a list of ideas on the left side of this page. After your conversation is over, go to the Things You Can Do to Help the Coral Reef Web site. While you’re there, take notes on the right side of this page. Before calling it quits, color code any matches you found on your right and left sides!
