

1. Lots of Rocks

A boulder, a cobble, and a pebble are in a gorge, a lake, and a valley. The rock in the valley is larger than the cobble. The cobble is not in the lake.

Where is each rock?

	boulder	cobble	pebble
gorge			
lake			
valley			

ANSWER

A pebble is smaller than a cobble, so the pebble is not the rock in the valley. Since the rock in the valley is not the cobble, it is the boulder. The cobble isn't in the lake, so the pebble is, and so the cobble is in the gorge.

ROCK	LOCATION
boulder	valley
cobble	gorge
pebble	lake
