

When playing baseball, you stand next to the red base to bat. If you hit the ball, you can hit a single (run to the blue base), a double (run to the blue base, then the orange base), a triple (run to the blue base, then the orange base, then to the black base), or a home run (go all the way around touching all bases and ending on the red base where you started).

1. If you hit a single, you would run to the blue base, which is also called _____ base.
2. If you hit a double, you would run to the orange base, which is also called _____ base.
3. If you hit a triple, you would run to the black base, which is also called _____ base.
4. If you hit a home run, you would run to the red base, which is also called _____ base.
5. If you hit a single, double, triple, and home run in one game, how many bases would you touch? _____

Answer

Page 2 1. first; 2. second; 3. third; 4. home or home plate; 5. ten
