

## Animal Homes

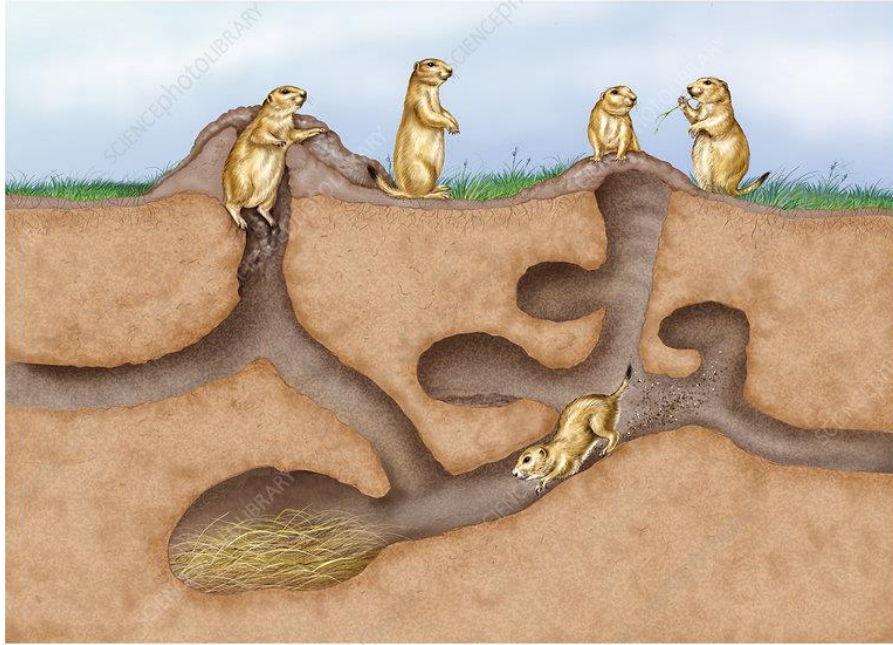

Read about the two different animal homes and then answer the questions about them.

Beavers build their homes. Their homes are called lodges. Beavers use sticks, logs, rocks and mud to build the lodge. Their homes are built in streams, lakes and ponds. The inside of a beaver lodge is the shape of a cave and is dry. Beavers swim under the water to get in to their homes.

1. How do beavers get in to their homes? \_\_\_\_\_

2. What does a beaver use to build its home? \_\_\_\_\_

Prairie dogs build their homes. Their homes are called burrows. They dig far down in to the ground. Prairie dogs make a mound of dirt where they go in. The burrow has many tunnels and chambers. Some of the chambers hold food, some are for listening for other animals and some are where they sleep.

1. How do prairie dogs build their homes? \_\_\_\_\_

2. What are the different chambers used for? \_\_\_\_\_
