

How Long?

Look at the three vegetables. Then, figure out which one is the longest or the shortest.

1. Farmer Bob was picking zucchini. He picked the first zucchini and it looked like a normal length. The next two zucchinis he picked were very different. Circle the zucchini that was the longest.

First zucchini

2. Farmer Susan was picking corn in her fields. She picked one ear of corn and it looked good. Then, she picked two more. Circle the ear of corn that was the shortest.

First ear of corn

3. Farmer Betsy was picking beans. She picked one bean and it looked like a normal bean. The next two beans were not normal beans. Circle the bean that was the longest.

First bean
