

Life Cycle of a Butterfly

Look at the diagram of the life cycle of a butterfly, read about it and then answer the questions.

A butterfly starts as an egg that is laid on a leaf. When it comes out of the egg, it is a caterpillar. The caterpillar forms a chrysalis. A butterfly comes out of the chrysalis and lays eggs.

1. What comes out of the egg? _____
2. What does a butterfly come out of? _____
3. Draw the life cycle of a butterfly:
