

Main Idea Paragraph

Octopus are sea animals that live in all of the oceans of the world. They have round bodies, big eyes, and eight long arms. Most octopus live on the floor of the ocean. Octopus eat crab, shrimp

and lobster. Octopus that are big can even eat sharks! Octopus eat by coming down from above, grabbing the animal and pulling them into their mouth with their arms.

Octopus can change colors to blend in with what is around them. Octopus like to live alone. Seals, whales and large fish like to eat octopus. When an octopus is scared, it sprays out dark ink that makes the water dark. This scares away anything around the octopus.
