

My Great Invention

Every invention starts out as an idea about how to solve a problem or make something easier. What ideas do you have about ways that something could be improved or even something that no one has thought of before? Your great invention must include at least one type of simple machine. Organize your ideas on this page.

The diagram is a flowchart centered around a large oval. Inside the oval, the text reads "Inventor:" followed by a blank line, and "Invention:" followed by a blank line. Four rectangular boxes are arranged around the oval, each with an arrow pointing towards one of the four large empty rectangular boxes at the corners of the page. The boxes are: "What purpose does it serve?" (top-left), "How does it work?" (top-right), "What simple machine does it use?" (bottom-left), and "Who would use it?" (bottom-right).
