

Name: _____

Date: _____

Parts of the Human Brain

Describe the job of each part of the brain:

Parietal Lobe:

Occipital Lobe:

Cerebellum:

Frontal Lobe:

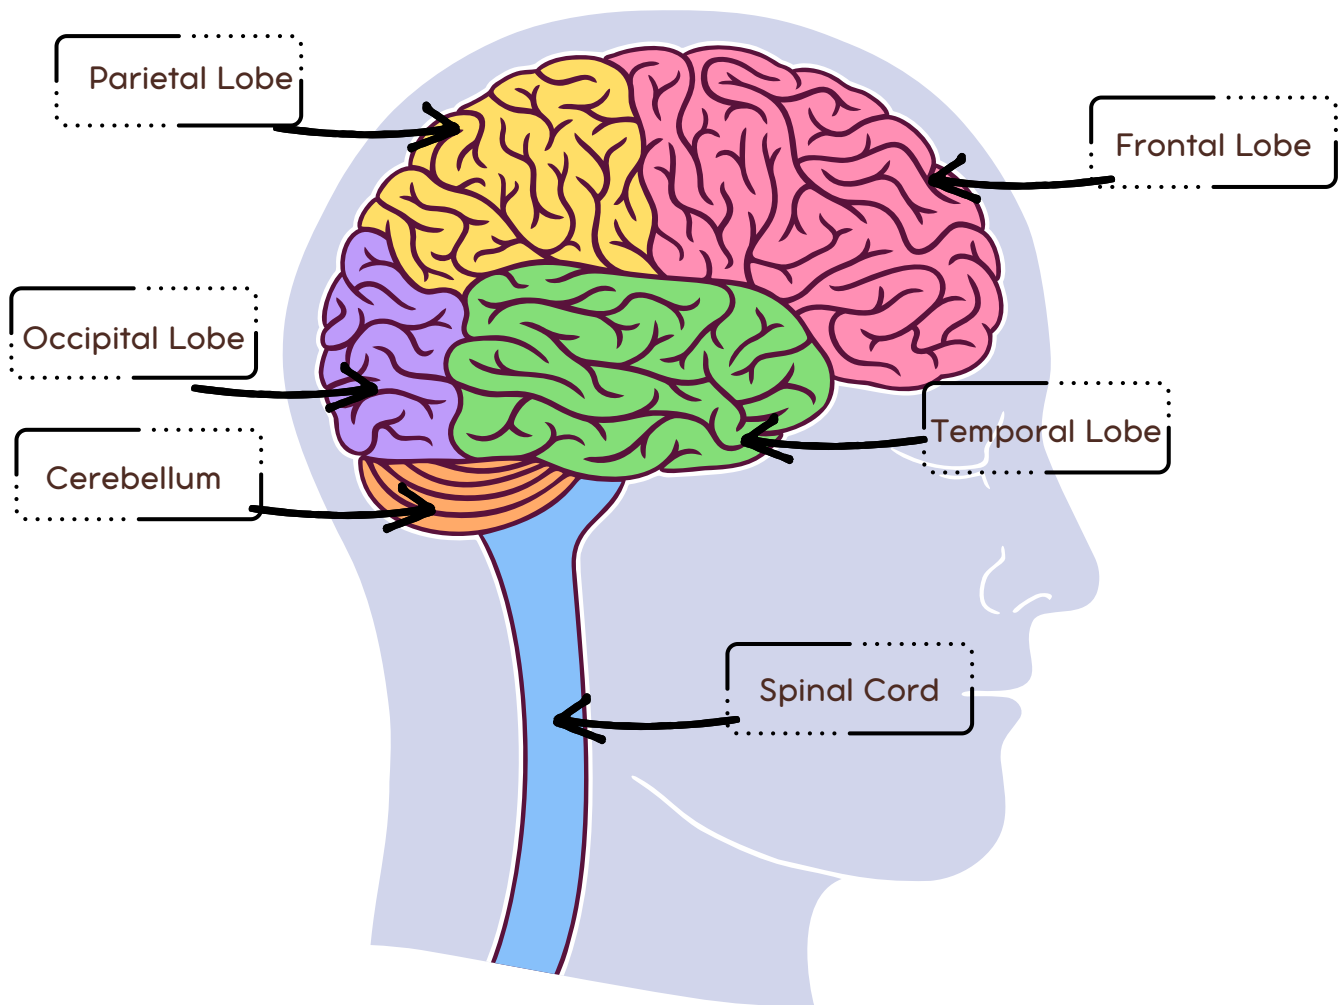

Temporal Lobe:

Spinal Cord:

Name: _____

Date: _____

Parts of the Human Brain

Describe the job of each part of the brain:

Parietal Lobe: Helps you feel touch, pain, and temperature, and understand where things are around you.

Occipital Lobe: Processes what your eyes see so you can understand shapes, colors, and movement.

Cerebellum: Controls your balance, coordination, and helps you move smoothly

Frontal Lobe: Helps you think, make decisions, plan, and control your actions.

Temporal Lobe: Helps you hear, understand sounds and language, and remember things.

Spinal Cord: Carries messages between your brain and the rest of your body to help you move and feel.
