

How Are Snowflakes Made?

Read about how snowflakes are formed. Then, answer the questions.

Snowflakes are made from water vapor. Water vapor are tiny drops of water in the air that you cannot see. Snowflakes are made in clouds. Water vapor freezes to a piece of dust in a cloud. More and more water vapor freeze together to make a snowflake. When the snowflake is heavy, it falls from the clouds. Snowflakes have six sides.

1. What is a snowflake made from? _____
2. Where is a snowflake made? _____
3. When does a snowflake fall? _____
4. How many sides does a snowflake have? _____
