

# It's About Time

Look at the example. Next, look at the time under each clock. Draw the hands on the clock to show the correct time.

Example:

1

1:00

2

6:30

3

8:30

5

12:30

6

10:00

4

5:30

9

2:30

10

4:30

7

11:30

8

3:30

Let your child look around your home for different clocks and watches. Have your child find out how many are analog clocks (clocks that display hands) and how many are digital. Remind your child to look for clocks on radios, video players, stoves, and other kinds of equipment and appliances. Later, ask your child to tell which kind of clock he finds easier to read and why.
