

Add or Subtract

Place + and – signs between the digits so that both sides of each equation are equal. The first one has been done for you.

1. $2 + 4 + 2 + 2 - 3 = 7$

2. $9 \quad 9 \quad 9 \quad 2 \quad 2 = 9$

3. $5 \quad 5 \quad 5 \quad 4 \quad 3 = 8$

4. $1 \quad 2 \quad 3 \quad 4 \quad 5 = 9$

5. $7 \quad 6 \quad 2 \quad 3 \quad 8 = 16$

6. $5 \quad 3 \quad 2 \quad 4 \quad 1 = 9$

7. $5 \quad 1 \quad 1 \quad 3 \quad 4 = 14$

8. $8 \quad 1 \quad 6 \quad 2 \quad 8 = 11$

9. $2 \quad 1 \quad 8 \quad 9 \quad 3 = 17$

10. $7 \quad 6 \quad 5 \quad 4 \quad 3 = 9$

11. $6 \quad 5 \quad 2 \quad 1 \quad 2 = 8$
